

Healthcare

Mobile technology is revolutionizing healthcare and improving the standard of care for patients. m-health is freeing up resources for in-hospital emergency and critical care by mobilizing solutions for remote patient care and post-surgery health monitoring.

M-health management solutions encompass the unified management of mobile devices, applications, content and data with uncompromising reliability and security.

WE MANAGE IT ALL

SOTI MobiControl for Healthcare

SOTI MobiControl for Healthcare is an enterprise grade mobility management platform that enforces secure use of mobile devices anywhere patient care is required. With SOTI MobiControl, healthcare practitioners can realize the full potential of mobility to improve patient care, without sacrificing the security and privacy of patient data. Since SOTI MobiControl is hardware agnostic, IT departments and helpdesks have a single, integrated, real time view across their wireless networks of all deployed devices.

Key Features For Healthcare

ADVANCED SECURITY POLICIES Safeguarding Mission Critical Content

Advanced security policies provide administrators with granular control over how mobile devices are used and data is accessed to ensure HIPAA or HITECH compliance. With advanced encryption to protect sensitive corporate data, Active Directory-based user authentication, Application Run Control, Hardware Feature Control and more, you can rest assured your data is secure.

KIOSK MODE Tailor Usage for Mission-Critical Applications Only

Kiosk Mode replaces the device's home screen with a customizable interface, providing a focused environment for mission-critical healthcare applications and a way to keep devices uniformly configured.

LOCATION BASED POLICIES / GEOFENCING Devices Tracked & Access Limited Based on Location

Accurate geo-location device tracking and user behavior monitoring can be plotted on an interactive worldwide map. Geofencing enables the creation of a virtual boundary around a geographical area to trigger alerts and pre-defined actions when devices enter or exit the boundary. Geo-aware content access allows enterprises to restrict access to sensitive corporate content based on location while still giving employees access to their personal content and applications.

HELP DESK AND REMOTE CONTROL Live, Real-Time Support

Fastest and most reliable interactive remote control of Android and Windows devices provides optimal Helpdesk capability and troubleshooting, as well as remote view and advanced device management available for iOS devices. These best-in-class remote helpdesk capabilities offer administrators the ability to support their growing mobile deployment effortlessly.

ADVANCED REPORTING ENGINE Strategic Mobility Insights

The SOTI MobiControl management console can be used to generate an extensive catalog of standard and custom reports on key areas of your enterprise mobility environment. High level or granular analytics can be automated and pre-scheduled to monitor numerous parameters over a specified time period. Reports can be generated and exported in all major file formats.

APPLICATION MANAGEMENT Seamless Administration of Healthcare Apps

Benefit from end-to-end application lifecycle management with app library and public app store, across all managed devices in your organization. Over-the-air capability enables IT administrators to distribute, update, monitor and control applications and devices through a single pane of glass.

CONTENT MANAGEMENT Secure Access to Patient Data & Mission-Critical Information

SOTI MobiControl's Secure Content Library is the ideal platform for securely distributing and managing sensitive content to your hospital employees and caregivers. Supporting all major formats, files can be delivered one-to-one, one-to-many or one-to-all. Secure Content Library gives you superior control over your content, allowing administrators to set priority levels, document expiry, and location based delivery.

LOCKDOWN FIRMWARE VERSION FROM AUTO UPDATING Prevent OS from Upgrading

HealthCare providers can prevent managed devices from automatically upgrading to the latest OS version release. This capability ensures that enterprise and line of business applications that are OS version specific do not malfunction when the firmware is upgraded.

Benefits of Mobile Security for Healthcare

PUT YOUR TRUST IN SOTI TO MANAGE YOUR MOBILITY NEEDS

AT-A-GLANCE ASSET MANAGEMENT

Keep track of your valuable mobile assets with robust reporting and analytics available in an intuitive web console.

MULTI-OS & DEVICE SUPPORT

Manage your entire fleet of mobile assets across all operating systems, OEM devices and network types in a single solution. The centralized, web-based management console provides total visibility and full control of your agency-owned, shared and personally-owned mobile devices.

SEAMLESS DELIVERY

SOTI provides enterprises with flexibility to deploy their mobility management solution as an On-Premise solution or as a subscription to the SOTI MobiControl Cloud.

A BIRDS-EYE VIEW OF MOBILE DEPLOYMENTS

Location based policy enforcement allows you to locate, track and secure your devices anywhere in the world.

KEEP COMPLIANCE ACROSS YOUR MOBILE DEPLOYMENT

Keep in front of regulatory compliance and eliminate data leakage gaps with centralized administration tools that control who can access data, and how, when and where that data can be accessed. And with robust reporting and logging features, you will always have an audit trail for your compliance needs.

SOTI is the world's most trusted leader in enterprise mobility management. Over 15,000 customers worldwide use SOTI's award-winning MobiControl to enhance enterprise mobility and enable Bring Your Own Device (BYOD) initiatives.
